

ADL Sentry at End of Life

February 2017

Pacific Crest has announced a last time buy program for the ADL Sentry UHF transceiver. The affected part numbers are as follows:

PN	Freq. Band
K01138	390-430 MHz
K01139	430-470 MHz

Pacific Crest will continue to accept orders for the ADL Sentry until 31 October 2017 (assuming parts availability). Pacific Crest will support each ADL Sentry module for 36 months after sale. This will include both technical support and repair (assuming parts availability). ADL firmware updates offered in the future will continue to be backward compatible with the ADL Sentry.

Customers are asked to consider using the ADL Vantage transceiver in place of the ADL Sentry. The two radios are identical internally. Externally the ADL Vantage can be fully configured with its front panel interface. It uses a locking LEMO-style serial connector in place of the ADL Sentry's Turck connector.

Please contact info@pacificcrest.com for more details.
