

ADL Sentry at End of Life

May 2017

Pacific Crest has announced a last time buy program for the ADL Sentry, a 390-470 MHz UHF transceiver module.

The affected part numbers are as follows:

| PN | Freq. Band |
|--------|-------------|
| K01138 | 390-430 MHz |
| K01139 | 430-470 MHz |

Pacific Crest will continue to accept orders for the ADL Sentry until 30 June 2017 (assuming parts availability). Pacific Crest will support each ADL Sentry radio for 36 months after sale. This will include both technical support and repair (assuming parts availability). ADL firmware updates offered in the future will continue to be backward compatible with the ADL Sentry.

Developers are asked to consider replacing the ADL Sentry in their products with the [ADL Vantage](#) 450 MHz UHF transceiver and [TMR1 All Weather](#) 900 MHz license-free transceiver.

Please contact info@pacificcrest.com for more details.
