

ADL SLR3 at End of Service

September 2018

In January 2014 Pacific Crest announced a last time buy program for the ADL SLR3, a UHF transceiver designed for insertion into the Leica Geosystems GS15 sensor. Two versions of the SLR3 radio were available:

- ADL SLR3-1, 390-430 MHz, P/N K01108
- ADL SLR3-2, 430-470 MHz, P/N K01109

Pacific Crest continued to accept orders for the ADL SLR3 until June 2014 and supported each ADL SLR3 for 36 months after sale. This included both technical support and repair as long as parts were available. The last service parts were consumed in August 2018 and **we are no longer accept RMAs** to repair ADL SLR3 or provide technical support for any units.
